

## ABSTRACT OF THE DISCLOSURE

A photo- or thermo-polymerizable composition including an alkali-soluble polymerizable polymer that contains a structure represented by the following general formula (I) on a side chain. In general formula (I), X represents a polymerizable group; A represents an alkali-soluble group; Q represents a hydrocarbon linking group or a hetero ring; Z<sup>1</sup> and Z<sup>2</sup> each independently represent a single bond or a hydrocarbon linking group; and P<sup>1</sup> to P<sup>5</sup> each independently represent a single bond, or a linking group constituted by a hydrogen atom, a nitrogen atom, an oxygen atom, a sulfur atom, and a carbonyl group (>C=O).

General formula (I)
